

Code decision for NorNed cable link

On the 13th of November 2007, the Office of Energy Regulation (DTe), the energy sector regulator in the Netherlands, published a so-called 'code decision' (affecting the Grid Code and the System Code) for the NorNed interconnector. As a result of this code decision, the daily deadline for submitting Energy Programmes (E Programmes) to TenneT will be extended from 1.00 p.m. to 2.00 p.m. as of 14 November 2007.

The new submission deadline for E Programmes will also affect the daily deadlines for submitting T Prognoses, submitting bids for regulating and reserve capacity, and reporting regulating margins. These deadlines will be extended by no more than one hour. TenneT will modify the Implementation Regulations accordingly, and publish the new regulations on its website.
